

## iPHIS QUICK REFERENCE Outbreak Module: Unlinking and Linking Cases

On occasion, users must unlink a case from one outbreak and link it to another (e.g., unlink from a sporadic outbreak and link to a provincial outbreak). Note that the **Disease** for the case to be linked must be the same as the disease name for the new outbreak, in order for the linkage to work. Also, it is only possible to link a case to an outbreak for which your health unit is listed as a primary or secondary health unit under the **Outbreak Description** screen.

To unlink a case from an outbreak and link it to another, complete the following steps:

- 1. Search for the **Case ID** via **Outbreak > Case Search**.
- 2. Select Unlink on the Case Search Results screen.
- 3. iPHIS will display the message, "This will unlink the case from the outbreak. Do you wish to continue?" Select **OK**.

| Case Search Results        |                    |         |                  |                |                  |                                    |  |                     |                |                         |                |

- 4. Navigate to **Outbreak > Outbreak Management**.
- 5. Search for the new outbreak by the **Outbreak Number**. Select the **Details** button corresponding to the appropriate outbreak.

| Outbreak Search Results      |                    |                                     |                            |   |                  |               |                    |              |         |
|------------------------------|--------------------|-------------------------------------|----------------------------|---|------------------|---------------|--------------------|--------------|---------|
| Health Unit<br>Responsible   | Outbreak<br>Number | Outbreak Name                       | Outbreak<br>Classification | Disease   | Reported<br>Date | Onset<br>Date | Outbreak<br>Status | Investigator |         |
| MOHLTC - PHD (0)             | 0000-2020-001      | 2019-NCOV - ONTARIO - 2020<br>01 30 | SUSPECT                    | CORONAVIRUSES CAUSING SEVERE ACUTE<br>RESPIRATORY ILLNESS |                  |               | OPEN               |              | Details |
| Search Again New Description |                    |                                     |                            |   |                  |               |                    |              |         |

- 6. Select Link Cases.
- 7. Search for the case on the **Case Link Search** screen using the **Case ID**.
- 8. Select the Link checkbox for the case from the search results summary table.

| Case Link Search                                 |  |
|--|--|
| Query cases within specified date range & HA     |  |
| Start Date 🛛 🖗 End Date 🧖                        | Health Unit Responsible MOHLTC - PHD (0)                                       |
| Case Classification                              | Case ID 1108033  |
| Search For: Unlinked 💿 Linked 🔿 Both 🔿           |  |
| Search   |  |
| Link .ast Name First Name Health Unit Responsibl | e Reported Date Case Status Case ID Disease                                    |
| SQUASH SAM MOHLTC - PHD (0)                      | 2020-01-23 OPEN 1108033 CORONAVIRUSES CAUSING SEVERE ACUTE RESPIRATORY ILLNESS |
| Save Link All Unlink All                         |  |

**Reminder:** iPHIS will not display the **Link** checkbox if the case's classification is not available in the new outbreak. The **Case Classification** value of the case to be linked must also be available within the **Outbreak Description** of the new outbreak. In this situation, relink the case to the original outbreak and update the case classification. If users do not relink the case to an outbreak, it becomes an orphaned case and becomes inaccessible via **Outbreak > Case Search**.

 Select Save. iPHIS will refresh the screen. The case has been successfully linked to the other outbreak if no errors display. Users can validate the linking process by searching for the case via Outbreak > Case Search.

## Online resources available:

An e-learning module for <u>Linking and Unlinking cases</u> in iPHIS is available on Adobe Connect (until March 31, 2020).

Contact the Public Health Solutions Service Desk at 1-866-272-2794 or 416-327-3512 or email <u>PublicHealthSolutions@ontario.ca</u> for technical issues related to iPHIS.
