

ASSESS YOUR RISK OF EXPOSURE TO INFECTIONS

Perform a point-of-care risk assessment (PCRA), think about:

- Status of patient / client / resident
- Their environment
- The activity you will be performing

**Do you have all
supplies needed for
the activity?**

**Did you perform
hand hygiene?**

**Do you need any
personal protective
equipment (PPE)?**

This applies to all staff

**ASSESS YOUR RISK
AT ALL TIMES**

**PROTECT YOURSELF AND
THOSE UNDER YOUR CARE**
