

Job Aid

How to Search and View Holding Point Location

Overview

Objective: To provide a detailed, step-by-step guide on how to search and view Holding Point Locations in Panorama Guided Workflow (PGW). Users can use this function to see the number of doses they have in possession and identify what they can administer.

Pre-Requisites: Access to the PGW system with appropriate permissions, and an organization with more than one Holding Point Location within a Holding Point, such as a hospital.

Audience: All PGW users with the following permissions: Guided Flow – All (Edit & View), Guided Flow – All (View Only), or Guided Flow – Inventory (Edit & View).

Best Practice: Users should only be using the previous and next buttons within PGW, and not the browser's buttons (i.e., forward, back and refresh).

Search Holding Point Location

In this flow, users can search and view the Holding Point Location (HPL) information. An HPL represents a physical storage area, such as a shelf, within a Holding Point (HP). A Holding Point is any facility that stores inventory, such as a refrigerator. PGW users cannot update HPL information; any changes to an HPL must be requested through their Public Health Unit (PHU).

Follow these steps to search for holding point location details:

1. Click the **Maintain Holding Point Location / View Inventory**.

2. Verify the **Holding Point Name**.

3. Click **Search**.

Note: In most cases, the **Holding Point Name** will be automatically populated based on your organization's assigned operational Holding Point.

Note: If you need a new HPL or need to update existing HPL details, contact your PHU to submit a request.

View Holding Point Location

Follow these steps to view your holding point location details:

1. Review the **Search Results** and select the radio button beside the **Holding Point Location** you would like to view.
2. Click **View HPL Inventory**.

Immunizing Agent	Trade Name	Product Alternative ID	Product Lot	Current Expiry Date	Quantity Available (Doses)
COVID-19 mRNA	COVID-19 SPIKEVA...	657167600	D05440A	2026 Jun 26	2
COVID-19 mRNA	COVID-19 SPIKEVA...	657167600	D05437B	2026 Jun 19	3
COVID-19 mRNA	COVID-19 SPIKEVA...	657167000	3055248	2026 Aug 04	37

Note: By default, HPL's Storage Type is set to "Operational" and Cold Chain Capable is set to "Refrigerated". You can view inventory details for HPLs, but you will not be able to directly edit. For any changes or questions, contact your PHU for assistance

Inventory | Key PGW Terminology

Term	Definition
Cold Chain Capable	This indicates a system, facility, or piece of equipment that has the tools and power to keep vaccines at the right cold temperature.
Cold Chain Quarantine	This indicates whether items will be received into an HPL type that is "Cold Chain Quarantine" when a temperature excursion (cold chain break) occurs.
Holding Point (HP)	Any facility that stores inventory. A facility is assigned a Holding Point Code which is a unique identifier assigned by the PHU.
Holding Point Location	Holding Point Locations (HPLs) represent physical locations (e.g., refrigerated lockers, freezers, shelves) within a Holding Point (HP) where inventory is managed and tracked.
Immunization Agent	The Immunizing Agent drop-down list in PGW contains all vaccines (agents) that are currently licensed for use in Canada. PGW users should only select COVID-19.
Organization	This is the name of the organization that the PGW user belongs to.
Requisition	A formal order for products
Requisition ID	PGW system-generated number that uniquely identifies each requisition

Additional Support - Key Contacts
