

Radon is a naturally occurring radioactive gas that causes lung cancer.

It is found in buildings such as homes, schools, and offices.

It is colourless and odourless.

Radon can be found all over Ontario.

WHAT CAN YOU DO ABOUT RADON?

Testing and remediation for radon are easy. Test kits are available at your local hardware store.

WHAT CAN WE ALL DO ABOUT RADON?

Building codes can help control radon levels indoors.

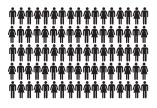

Radon is the second cause of lung cancer after smoking." World Health Organization

OF LUNG CANCER deaths in Ontario are due to radon. approximately

This is equivalent to over 2 people in Ontario dying each day from lung cancer caused by radon.

850 lung cancer deaths each year in Ontario.

That is equal to about
