Coronavirus Disease 2019 (COVID-19)
How to Self-Monitor

Follow the advice that you have received from your health care provider.
If you have questions, or you start to feel worse, contact your health care provider, Telehealth (1-866-797-0000) or your public health unit.

Monitor for symptoms for at least 10 days after exposure

- Fever
- Cough
- Difficulty breathing

Avoid public spaces
- Avoid crowded public spaces and places where you cannot easily separate yourself from others (a minimum of two metres) if you become ill.
- If you are unable to maintain a two metre distance, wear a non-medical mask or face covering to protect others from your potentially infectious droplets.

What to do if you develop these or any other symptoms
- Self-isolate immediately and contact your public health unit and your health care provider.
- To self-isolate you will need:
  - Instructions on how to self-isolate
  - Soap, water and/or alcohol-based hand sanitizer to clean your hands
- When you visit your health care provider, avoid using public transportation such as subways, taxis and shared rides. If unavoidable, wear a mask and keep a two metre distance from others or use the back seat if in a car.

Learn about the virus
