New Content (updated daily)

Public Health Agencies

Public Health Agency of Canada | canada.ca

COVID-19 is a serious health threat, and the situation is evolving daily. The risk varies between and within communities, but given the number of cases in Canada, the risk to Canadians is considered high.

- **2019 novel coronavirus: outbreak update**
  - **May 20, 2021**, 19:00 EST, **1,347,445** cases of COVID-19 have been confirmed in Canada and there are currently **59,968** active cases. **25,111** people have died of COVID-19. Individuals tested: **33,863,629**.
  - **May 19, 2021**, 19:00 EST, **1,342,388** cases of COVID-19 have been confirmed in Canada and there are currently **61,608** active cases. **25,066** people have died of COVID-19. Individuals tested: **33,754,111**.
  - **May 18, 2021**, 19:00 EST, **1,338,141** cases of COVID-19 have been confirmed in Canada and there are currently **64,748** active cases. **25,018** people have died of COVID-19. Individuals tested: **33,668,274**.

- **COVID-19 vaccination in Canada**
  - As of **May 20, 2021**, 19:00 EST, there have been **19,840,991** vaccine doses administered.
  - As of **May 20, 2021**, 11:00 EST, there have been **19,695,253** vaccine doses administered.
  - As of **May 19, 2021**, 19:00 EST, there have been **19,444,304** vaccine doses administered.

- **Government of Canada extends quarantine measures and travel restrictions** [05-21-2021]

- **Statement from the Chief Public Health Officer of Canada** [05-20-2021]
  - “As vaccine programs continue to expand, many of us are achieving priming protection from our first dose of COVID-19 vaccine this spring and summer, to be followed by our second - immunity boosting dose - that will maximise protection. During this time, as immunity builds up across the population, it is still important to continue following local public health advice, including when and where to maintain essential precautions, such as masking and spacing and observing gathering restrictions. This will help us stay healthy, while allowing us to safely enjoy more activities and small reunions outdoors. Maintaining a cautious approach now, will set up us up for a better summer and fall. Continued efforts are needed to reduce infection rates to low, manageable levels, ease pressure on the health system and re-establish public health capacity that will put us in a better position to prevent a fall resurgence.”

- **COVID-19 information and resources: reducing your risk for infection and spreading the virus** [05-19-2021]

- **Statement from the Public Health Agency of Canada** [05-17-2021]

- **Government of Canada launches new “Ripple Effect” advertising campaign to encourage COVID-19 vaccination** [05-17-2021]

World Health Organization | who.int

- Director-General’s live speech on Global Health Summit - Italian G20 Presidency and the European Commission [05-21-2021]
  - “Yesterday alone, more than 13 thousand people around the world lost their lives to COVID-19 – nine every single minute. Today the number will be similar. And tomorrow, and the next day. And people will continue to die as long as the global disparity in vaccines persists. Yes, the rapid development of COVID-19 vaccines is a triumph of science. But their inequitable distribution is a failure for humanity. Almost 90% of all vaccines administered globally have been in G20 countries. We can only end the pandemic if everyone has the tools to stop it. First, end this pandemic, with a combination of tailored public health measures and the equitable distribution of vaccines. [...] Second, strengthen health security, nationally and globally. [...] And third, drive progress towards universal health coverage in all countries, based on strong primary health care.”

- The impact of COVID-19 on global health goals [05-20-2021]
- World Health Assembly to focus on ending COVID-19 pandemic and preparing for next one [05-19-2021]
- New international expert panel to address the emergence and spread of zoonotic diseases [05-20-2021]
- WHO Director-General’s Keynote Address at the Commonwealth Health Ministers Meeting [05-20-2021]
  - “One of the many lessons of the pandemic is that we can only confront shared threats with shared solutions.
In an era when the forces of nationalism and isolationism threaten to tear at the fabric of international relations, the pandemic has shown that multilateralism is needed now, more than ever.
Groupings like the Commonwealth bring communities and nations together and provide a global voice, particularly for small states and small island developing states.
WHO is providing support to small island developing states for climate change readiness, adaptation, resilient health systems and food security.
WHO is committed to strengthening our partnership with the Commonwealth, and I look forward to signing the Memorandum of Understanding between our two organizations as soon as possible.”
