  o “[I’m] asking countries with doses of vaccines that have WHO Emergency Use Listing to donate as many doses as they can to help us meet that target. And I’m asking manufacturers to help ensure these countries can rapidly donate those doses. There are plenty of countries who can afford to donate doses with little disruption to their own vaccination plans. The more countries that donate A.S.A.P., the more doses we will have to share with countries who need them desperately. Sharing doses is a tough political choice, and governments need the support of their people. I’m encouraged by surveys in high-income countries showing widespread support for vaccine equity.”
