- Statement from the Chief Public Health Officer of Canada [09-03-2020]
  - “In order to get and stay healthy, we must ensure that the physical and social environments in which we live are healthy places. To help support these efforts, the Government of Canada recently announced the Canada Healthy Communities Initiative to help governments and community partners advance the goal of healthier living environments during the COVID-19 pandemic. This initiative will provide funding to small-scale, local projects that help adapt public spaces and places to the healthy living needs of their communities during these unprecedented times.”

Yesterday I had the honour of addressing foreign ministers from G20 countries. The focus of the discussion was on how together we can reopen societies, economies and borders. This is something WHO supports wholeheartedly. Lockdowns are a blunt instrument that have taken a heavy toll in many countries. With the right mix of targeted and tailored measures, further national lockdowns can be avoided. Several countries are using a data-driven approach to drive a targeted response. This is allowing them to open up carefully and safely, while remaining ready to respond rapidly to any new clusters or amplifying events. Once again, I want to reiterate the four priorities we urge countries to focus on:

- Prevent amplifying events.
- Empower people to protect themselves and others.
- Focus on the public health basics.
- And protect the vulnerable, including older people and those with underlying conditions.”
