Public Health Agencies

Public Health Agency of Canada | canada.ca

- **2019 novel coronavirus: outbreak update**
  - **September 15, 2020, 19:00 EDT, 138,803** cases of COVID-19 have been confirmed in Canada. 9,188 people have died of COVID-19. Individuals tested: **6,292,160**.
  - **September 14, 2020, 19:00 EDT, 138,010** cases of COVID-19 have been confirmed in Canada. 9,179 people have died of COVID-19. Individuals tested: **6,235,465**.
  - **September 13, 2020, 19:00 EDT, 136,659** cases of COVID-19 have been confirmed in Canada. 9,171 people have died of COVID-19. Individuals tested: **6,154,468**.

- **Statement from the Chief Public Health Officer of Canada on September 16, 2020 [09-16-2020]**
  - “Testing enables local public health agencies to interrupt chains of transmission and prevent further spread of the virus through case detection and contact tracing, and isolation and quarantine, respectively. I recognize that there may be line-ups at some local testing facilities, and awaiting test results may be stressful and disruptive to your family and work life, but I thank you for your patience. Your actions are vital to keeping COVID-19 activity at manageable levels. Being tested for COVID-19 is an act of kindness, and frankly, bravery -- it means you are choosing not only to protect yourself, but also to protect those around you. If the test is positive, that starts the process of local public health authorities notifying others who may have been exposed so they can take steps to self-isolate and get tested if they develop symptoms.”
