Public Health Agencies

Public Health Agency of Canada | canada.ca

- **2019 novel coronavirus: outbreak update**
  - **June 14 2020**, 19:31 EDT, **98,787 cases** of COVID-19 have been confirmed in Canada. **8,146** people have died of COVID-19. Individuals tested: **2,152,776**.
  - **June 13, 2020**, 19:30 EDT, **98,410 cases** of COVID-19 have been confirmed in Canada. **7,960** people have died of COVID-19. Individuals tested: **2,113,924**.
  - **June 12, 2020**, 20:01 EDT, **97,983 cases** of COVID-19 have been confirmed in Canada. **8,049** people have died of COVID-19. Individuals tested: **2,072,096**.

- **Statement from the Chief Public Health Officer of Canada on Saturday, June 13 2020** [06-13-2020]
  - More and more Canadians are wearing non-medical masks or face coverings in situations where it is difficult to maintain a physical distance of 2 metres from others. A recent Leger poll released Tuesday shows that 51% of Canadians wear a mask when they go grocery shopping, which is an 8% increase since the survey was conducted two weeks ago. This additional layer helps us protect one another from infection in areas where COVID-19 is still active.

- **Statement from the Chief Public Health Officer of Canada on Friday, June 12 2020** [06-12-2020]
  - Today, I would like to talk about misinformation – the unintentional sharing of false or misleading information. There is no place for misinformation on any day, least so during a crisis on the scale of COVID-19. It detracts from progress and solutions and results in real harm. At times during COVID-19, we have been dealing with two epidemics: the disease, and misinformation about the disease. Although well-intentioned people typically share misinformation that they believe to be true, the source can often be traced back to a deliberate fabrication.

• Feasibility, potential value and limitations of establishing a closely monitored challenge model of experimental COVID-19 infection and illness in healthy young adult volunteers [06-15-2020]
  o “No organization and no country can fight this pandemic alone. Only by working together will we overcome this global threat.”
• WHO Director-General’s opening remarks at the media briefing on COVID-19 [06-12-2020]
  o “As the pandemic accelerates in low- and middle-income countries, WHO is especially concerned about its impact on people who already struggle to access health services – often women, children and adolescents. The indirect effects of COVID-19 on these groups may be greater than the number of deaths due to the virus itself. Because the pandemic has overwhelmed health systems in many places, women may have a heightened risk of dying from complications of pregnancy and childbirth. WHO has developed guidance for health facilities and community activities on maintaining essential services, including for women, newborns, children and adolescents.”
