Public Health Agencies

Public Health Agency of Canada | canada.ca

- 2019 novel coronavirus: outbreak update
  - January 6, 2021, 19:00 EST, 626,799 cases of COVID-19 have been confirmed in Canada and there are currently 79,203 active cases. 16,369 people have died of COVID-19. Individuals tested: 14,243,625.
  - January 5, 2021, 19:00 EST, 618,646 cases of COVID-19 have been confirmed in Canada and there are currently 78,849 active cases. 16,233 people have died of COVID-19. Individuals tested: 14,180,625.
  - January 4, 2021, 19:00 EST, 611,424 cases of COVID-19 have been confirmed in Canada and there are currently 77,466 active cases. 16,074 people have died of COVID-19. Individuals tested: 14,121,468.
- Statement from the Chief Public Health Officer of Canada [01-07-2021]
  - “To date, provinces and territories have reported 11 cases of a virus variant first reported in the United Kingdom and 0 reports of any other variants of concern, including a variant first reported in South Africa. Given these virus variants have been reported in multiple countries, the Government of Canada continues to advise Canadians against non-essential travel outside of Canada and are advising extra caution if you must travel to countries where a variant of concern is circulating. In addition to Canada’s current travel and border measures, which include mandatory 14-day quarantine, new pre-departure COVID-19 testing requirements were introduced today as an additional layer to reduce new introductions of the virus and limit the spread of COVID-19 in Canada. Documentation of a negative laboratory test result for COVID-19 must be presented to the airline prior to departing for Canada for all air travellers five years of age or older. The test must be performed using a COVID-19 molecular test within 72 hours prior to boarding a flight to Canada.”
- Statement from the Chief Public Health Officer of Canada [01-06-2021]
  - “[O]utbreaks continue to occur in high-risk populations and communities, including hospitals and long term care homes, correctional facilities, congregate living settings, Indigenous communities, and more remote areas of the country. The downstream impacts of weeks and months of elevated disease activity continues to be seen in still rising numbers of severe illness and death, significant disruptions to health services and ongoing challenges for areas not adequately equipped to manage complex medical emergencies.”
- COVID-19 testing centre for arriving international travellers launches at Pearson Airport [01-06-2021]

World Health Organization (WHO) | who.int
• WHO Director-General’s opening remarks at the Member States briefing on COVID-19 [01-07-2021]
  o “This week, we convened WHO’s Strategic Advisory Group of Experts on Immunization to discuss policy recommendations for the use of the Pfizer/BioNTech vaccine. Consistent with WHO’s previous advice, SAGE has recommended that health workers be prioritized for vaccination, followed by older people. This is the fastest way to stabilize health systems, restore essential health services and stimulate a truly global economic recovery. [...] I challenge each and every one of us to do everything possible to reduce cases as quickly as possible while simultaneously increasing production and rollout of vaccines.”
• Coronavirus disease (COVID-19) weekly epidemiological update [01-05-2021]
• Islamic Republic of Iran tackles COVID-19 by enhancing primary health care [01-05-2021]
• WHO issues its first emergency use validation for a COVID-19 vaccine and emphasizes need for equitable global access [12-31-2020]
• WHO Director-General’s opening remarks at the media briefing on COVID-19 [01-05-2021]
  o “Ultimately we need to invest in preparedness and surveillance to stop the next pandemic and ensure that everyone has access to quality health services. In the year ahead, scientists and public health experts from inside and outside WHO will continue to work with us to break down the latest science and innovations and putting forward solutions so that we can build back greener and stronger health systems.”
