Public Health Agencies

Public Health Agency of Canada | canada.ca

- 2019 novel coronavirus: outbreak update
  - November 12, 2020, 19:00 EDT, 282,577 cases of COVID-19 have been confirmed in Canada and there are currently 45,034 active cases. 10,768 people have died of COVID-19. Individuals tested: 10,158,802.
  - November 11, 2020, 19:00 EDT, 277,061 cases of COVID-19 have been confirmed in Canada and there are currently 43,177 active cases. 10,685 people have died of COVID-19. Individuals tested: 10,097,037.
  - November 10, 2020, 19:00 EDT, 273,037 cases of COVID-19 have been confirmed in Canada and there are currently 41,126 active cases. 10,632 people have died of COVID-19. Individuals tested: 10,044,798.
- Statement from the Chief Public Health Officer of Canada [11-12-2020]
  - “With colder weather, we are moving indoors. Canadians should avoid the 3Cs settings – closed spaces, crowded places and close contact situations - wherever possible. Larger clusters tell us that closed spaces with poor ventilation, crowded places where many people gather and close contact situations can amplify spread of the virus. Spread in informal social gatherings and activities is also occurring. In these more relaxed settings, such as family and holiday celebrations and recreational activities, letting our guard down and not consistently maintaining public health practices, can lead to many exposures and infections. For these reasons, it is recommended that everyone wear a non-medical mask or face covering when spending time indoors with people from outside of your immediate household.
- Statement from the Chief Public Health Officer of Canada [11-11-2020]
  - “[Today] on this Remembrance Day, please take a moment to reflect, remember and honour those who have served – past and present – for our country. I encourage Canadians to share stories, photos and videos on social media using #CanadaRemembers and participate in the online commemorations.”

World Health Organization (WHO) | who.int

  o “The COVID-19 pandemic has demonstrated the consequences of chronic under-investment in public health. This health crisis has ignited a socio-economic crisis that has impacted billions of lives and livelihoods and undermined global stability and solidarity. Returning to the status quo is not an option. We don’t just need more investment in public health. We must also rethink how we value health. The time has come for a new narrative that sees health not as a cost, but an investment that is the foundation of productive, resilient and stable economies.”
- WHO Director-General’s speech at the Paris Peace Forum session "Team Europe response to COVID-19: Control this pandemic and prevent the next one" - 12 November 2020 [11-12-2020]
  o Today I would like to suggest three fundamental shifts that WHO believes all countries must make.
  First, invest in public health. Many countries have made huge investments and advances in medicine, but too many have neglected their basic public health systems, which are the bedrock for preventing, preparing for, detecting and responding to outbreaks.
  Second, take a One Health approach. The pandemic has highlighted the intimate links between the health of humans, animals and planet, which we can only address with a One Health approach. Any efforts to improve human health are doomed unless they address these critical interfaces and the threat of climate change.
  Third, go beyond the health sector. We will not prevent the next pandemic by focusing only on strengthening health systems. The pandemic has affected every sector, so it stands to reason that every sector must be involved in the recovery, and in preparedness.
