New Content (updated daily)

Public Health Agencies

Public Health Agency of Canada | canada.ca

COVID-19 is a serious health threat, and the situation is evolving daily. The risk varies between and within communities, but given the number of cases in Canada, the risk to Canadians is considered high.

- **2019 novel coronavirus: outbreak update**
  - **September 24, 2021**, 19:00 EST, **1,598,807** cases of COVID-19 have been confirmed in Canada and there are currently **45,042** active cases. **27,620** people have died of COVID-19. Individuals tested: **42,704,739**.
  - **September 23, 2021**, 19:00 EST, **1,594,200** cases of COVID-19 have been confirmed in Canada and there are currently **44,974** active cases. **27,581** people have died of COVID-19. Individuals tested: **42,577,954**.
  - **September 22, 2021**, 19:00 EST, **1,589,602** cases of COVID-19 have been confirmed in Canada and there are currently **44,796** active cases. **27,537** people have died of COVID-19. Individuals tested: **42,461,055**.

- **COVID-19 vaccination in Canada**
  - As of **September 27, 2021**, 11:00 EST, there have been **55,692,198** vaccine doses administered.
  - As of **September 26, 2021**, 20:00 EST, there have been **55,622,135** vaccine doses administered.
  - As of **September 25, 2021**, 20:00 EST, there have been **55,576,227** vaccine doses administered.
  - As of **September 24, 2021**, 20:00 EST, there have been **55,519,317** vaccine doses administered.

- **Statement from the Chief Public Health Officer of Canada** [09-24-2021]
  - “As of September 23, 2021, provinces and territories have administered over **55.5 million doses of COVID-19 vaccines**, with the latest provincial and territorial data indicating that over 87% of people aged 12 years or older have received at least one dose of COVID-19 vaccine and over 80% are now fully vaccinated. **Age-specific vaccine coverage data**, as of September 18, show that from 78% to 97% of people in the eligible age groupings have received at least one dose and from 68% to 95% are fully vaccinated. We must strive to have as many eligible people as possible fully vaccinated as quickly as possible to protect ourselves and others, including those who may not mount a strong immune response or who cannot get vaccinated. This fall, implementing timed and targeted public health measures and maintaining individual protective practices will be crucial for slowing infection rates and reducing the impact on healthcare capacity, as we cover this last stretch to reach very high vaccine coverage across all eligible age groups, especially those aged 18-39 years.”

- WHO Director-General’s remarks at the Member State Information Session on COVID-19 [09-23-2021]
  - “Global production has been scaling up, and we estimate there is enough supply, but we are failing to provide equitable access. But about 80 percent of the vaccines have gone to high and upper-middle income countries. Low income countries have received less than 1%. Let’s be clear: COVID-19 cannot be beaten one country at a time. My friends, the investment needed to achieve global vaccination coverage is substantial, but compared to the costs we face if this is not brought under control, it is peanuts. Let’s get this finished.”
