Public Health Agencies

Public Health Agency of Canada | canada.ca

COVID-19 is a serious health threat, and the situation is evolving daily. The risk varies between and within communities, but given the number of cases in Canada, the risk to Canadians is considered high.

- **2019 novel coronavirus: outbreak update**
  - **May 05, 2021**, 19:00 EST, **1,257,328** cases of COVID-19 have been confirmed in Canada and there are currently **81,671** active cases. **24,450** people have died of COVID-19. Individuals tested: **32,127,668**.
  - **May 04, 2021**, 19:00 EST, **1,249,950** cases of COVID-19 have been confirmed in Canada and there are currently **82,700** active cases. **24,396** people have died of COVID-19. Individuals tested: **32,009,489**.
  - **May 03, 2021**, 19:00 EST, **1,243,242** cases of COVID-19 have been confirmed in Canada and there are currently **83,544** active cases. **24,342** people have died of COVID-19. Individuals tested: **31,897,888**.

- **COVID-19 vaccination in Canada**
  - As of **May 06, 2021**, 11:00 EST, there have been **14,795,554** vaccine doses administered.
  - As of **May 05, 2021**, 19:00 EST, there have been **14,568,067** vaccine doses administered.
  - As of **May 05, 2021**, 11:00 EST, there have been **14,477,773** vaccine doses administered.

- **Statement from the Chief Public Health Officer of Canada [05-06-2021]**
  - “For more information regarding the risks and benefits of vaccination, I encourage Canadians to reach out to your local public health authorities, healthcare provider, or other trusted and credible sources, such as Canada.ca and Immunize.ca. Working together, Health Canada, the Public Health Agency of Canada, the National Advisory Committee on Immunization, Canada’s Chief Medical Officers of Health and other health professionals across the country are closely monitoring vaccine safety, effectiveness and optimal use to adapt approaches. As the science and situation evolves, we are committed to providing clear and evidence-informed guidance in order to keep everyone in Canada safe and healthy.”

**World Health Organization | who.int**

- **WHO Director-General’s opening remarks at the Member State information session on COVID-19** [05-06-2021]
  - “Around the world, cases of COVID-19 have increased for the ninth straight week, and deaths have increased for the sixth straight week. More cases of COVID-19 have been reported globally in the past two weeks than during the first six months of the pandemic. Over the last several weeks, countries in each WHO region have shown a sustained upward trend in cases and deaths. Now is not the time to let our guard down, even for countries that are now seeing declines in cases. Alongside vaccination, all countries must continue with a tailored and consistent application of the proven public health measures that have been the backbone of the response to date – including hand hygiene. Yesterday was World Hand Hygiene Day, a reminder that clean hands save lives, especially at the point of care. And yet globally, one-third of health facilities lack hand hygiene resources at the point of care, and one quarter of health facilities do not even have access to basic water services.”
