New Content (updated daily)

Public Health Agencies

Public Health Agency of Canada | canada.ca

- **2019 novel coronavirus: outbreak update**
  - **December 03, 2020**, 19:01 EST, **396,270** cases of COVID-19 have been confirmed in Canada and there are currently **69,255** active cases. **12,407** people have died of COVID-19. Individuals tested: **11,739,689**.
  - **December 02, 2020**, 19:00 EST, **389,775** cases of COVID-19 have been confirmed in Canada and there are currently **67,564** active cases. **12,325** people have died of COVID-19. Individuals tested: **11,652,814**.
  - **December 01, 2020**, 19:00 EST, **383,468** cases of COVID-19 have been confirmed in Canada and there are currently **66,369** active cases. **12,211** people have died of COVID-19. Individuals tested: **11,573,522**.

- **Statement from the Chief Public Health Officer of Canada** [12-03-2020]
  - “Today, I want to acknowledge the International Day for Persons with Disabilities (IDPD). Accessibility is about identifying and removing barriers that prevent people from participating fully in our homes, schools, workplaces and communities. We know that people with disabilities have been disproportionately impacted by the COVID-19 pandemic and related public health measures. Isolation, disconnection, and diminished services have greatly impacted mental well-being, and many people with long-term conditions or disabilities have experienced temporary or permanent job loss or reduced hours during the pandemic.”

- COVID-19: guidance on shielding and protecting people defined on medical grounds as extremely vulnerable [updated 12-02-2020]
As you may know, yesterday the United Kingdom became the first country to approve a vaccine with demonstrated efficacy for COVID-19. It is incredible to think that less than a year ago, we had not even heard of this virus, and now we have an approved vaccine against it. WHO has an unwavering commitment to equitable, timely and fair access to all the tools that can serve to mitigate and end this pandemic, including vaccines. There is a great deal of work to do in each country to make that a reality. In the beginning, of course, vaccine quantity will be limited, but will increase over the course of 2021. This means that not all countries will receive doses at exactly the same time, but as supplies increase, countries will receive vaccines as quickly as possible. In the meantime, we are working with countries to make sure that they are prepared to receive and deliver vaccines.

We are here, along with our partners, to do everything possible to ease the way.”
