New Content (updated daily)

Public Health Agencies

Public Health Agency of Canada | canada.ca

COVID-19 is a serious health threat, and the situation is evolving daily. The risk varies between and within communities, but given the number of cases in Canada, the risk to Canadians is considered high.

- **2019 novel coronavirus: outbreak update**
  - June 2, 2021, 19:00 EST, 1,385,278 cases of COVID-19 have been confirmed in Canada and there are currently 29,277 active cases. 25,612 people have died of COVID-19. Individuals tested: 34,927,851.
  - June 1, 2021, 19:00 EST, 1,383,214 cases of COVID-19 have been confirmed in Canada and there are currently 31,164 active cases. 25,566 people have died of COVID-19. Individuals tested: 34,789,993.
  - May 31, 2021, 19:00 EST, 1,381,582 cases of COVID-19 have been confirmed in Canada and there are currently 33,753 active cases. 25,547 people have died of COVID-19. Individuals tested: 34,790,069.

- **COVID-19 vaccination in Canada**
  - As of June 3, 2021, 14:00 EST, there have been 24,797,032 vaccine doses administered.
  - As of June 2, 2021, 19:00 EST, there have been 24,514,134 vaccine doses administered.
  - As of June 1, 2021, 19:00 EST, there have been 24,169,193 vaccine doses administered.

- **Statement from the Chief Public Health Officer of Canada [06-03-2021]**
  - “Despite the steady increase in vaccine coverage in Canada, we know that some people may still have questions about getting vaccinated, while others may experience difficulties in accessing vaccination due to a range of reasons from mobility challenges to schedules, childcare or other reasons. There are many ways you can help and encourage family members, friends, and others in your community or social circle to get vaccinated. One way is to share your personal stories of getting an appointment, going for your vaccination and relaying the benefits of COVID-19 vaccination for you and your loved ones. Canada.ca has a suite of social media tools you can use to share your experience and you can also use popular hashtags such as #myWHY to reach into a conversation thread and share your most compelling personal reasons for getting vaccinated. Another way to support your community is by helping others find, book and get to their vaccination appointments-this can be especially helpful for those who may face barriers in booking or getting to an appointment on their own. Ways to help can be as simple as sharing information about booking vaccines in your community, such as updated eligibilities and how to schedule appointments. Every vaccination counts and the more people who get fully vaccinated, the sooner and safer it will be to ease restrictions and then individual precautions, allowing us to get back to the interactions and activities that we miss so much, for a better outdoor summer and a safer fall and winter.”

How to manage COVID-19 vaccines without VVM at vaccination service points? [06-03-2021]
WHO Director-General’s remarks at G7 Health Ministers’ Meeting [06-03-2021]
  “We’re very encouraged that cases and deaths from COVID-19 are continuing to decline globally, but it would be a monumental error for any country to think the danger has passed. The inequitable distribution of vaccines means that globally, we have allowed the virus to continue spreading, increasing the chances of a variant emerging that renders vaccines less effective. Inequitable vaccination is a threat to all nations, not only those with the fewest vaccines. At last week’s World Health Assembly, I called for a massive global effort to vaccinate at least 10% of the population of all countries by the end of September, and at least 30% by the end of the year. The tailored and consistent
use of public health measures, in combination with equitable vaccination, remains the roadmap for ending this pandemic.”
