Coronavirus Disease 2019 (COVID-19)

This update is current as of 3:00 p.m. on the date it was posted.

NEW FREQUENCY ALERT

As of December 6, 2021 this document will be published on Tuesdays and Fridays. This change reflects the current COVID-19 landscape where the situational updates and guidelines are no longer being released daily by the relevant organizations.

This document is a collation of resources for your reference. For official guidance on COVID-19 in Ontario, please visit the Ministry of Health.

Public Health Agencies

Public Health Agency of Canada | canada.ca

COVID-19 is a serious health threat, and the situation is evolving daily. The risk varies between and within communities, but given the number of cases in Canada, the risk to Canadians is considered high.

- 2019 novel coronavirus: outbreak update
  - November 26, 2021, 19:03 EST, 1,782,171 cases of COVID-19 have been confirmed in Canada and there are currently 25,027 active cases. 29,618 people have died of COVID-19. Individuals tested: 48,485,509.
  - November 25, 2021, 19:00 EST, 1,777,814 cases of COVID-19 have been confirmed in Canada and there are currently 23,113 active cases. 29,600 people have died of COVID-19. Individuals tested: 48,388,107.
  - November 24, 2021, 19:01 EST, 1,774,946 cases of COVID-19 have been confirmed in Canada and there are currently 23,939 active cases. 29,580 people have died of COVID-19. Individuals tested: 48,289,007.

- COVID-19 vaccination in Canada
  - As of November 29, 2021, 11:00 EST, there have been 60,099,874 vaccine doses administered.
  - As of November 28, 2021, 20:00 EST, there have been 60,077,432 vaccine doses administered.
  - As of November 27, 2021, 20:00 EST, there have been 60,037,071 vaccine doses administered.
  - As of November 26, 2021, 20:00 EST, there have been 59,999,590 vaccine doses administered.

- Statement from Minister Duclos on first cases of Omicron variant of concern in Canada [11-28-2021]
  - “I was informed today by the Public Health Agency of Canada that testing and monitoring of COVID-19 cases has confirmed two cases of the Omicron variant of concern in Ontario. This development demonstrates that our monitoring system is working. I have spoken with my provincial counterpart in Ontario whose public health officials are working provincially and locally to contact and trace the cases. As the monitoring and testing continues with provinces and territories, it is expected that other cases of this variant will be found in Canada. I know that this new variant may seem concerning, but I want to remind Canadians that vaccination, in combination with public health and individual protective measures, is working to reduce the spread of COVID-19 and its variants in our communities.”

- Statement on the Omicron variant of concern found in Ontario [11-28-2021]
- Government of Canada introduces new measures to address COVID-19 Omicron variant of concern [11-26-2021]
- Statement from the Chief Public Health Officer of Canada [11-26-2021]
“Although the epidemiological significance of Omicron is still being assessed, it is considered unusual in that it has a very high number of mutations in two keys areas of the virus’ spike protein:

- one area of mutations is in the spike receptor binding domain where the virus attaches to and invades our cells, which could signify a potential for increased transmissibility of the virus.
- the other area of mutations is in what is referred to as the spike N-terminal domain, which is also known as the "antigenic supersite" because it is a target for our bodies defensive or “neutralising antibodies,” so mutations to this area of the virus may impact our body’s natural immunity as well as potentially reduce immunity induced by vaccines.”

CDC: Centers for Disease Control and Prevention | cdc.gov
As of November 29, 2021, we will move from publishing daily updates on vaccinations and case counts to weekly trends.
Note to readers: In observance of the Thanksgiving holiday, CDC will not publish the COVID Data Tracker Weekly Review on Friday, November 26, 2021. The Weekly Review will resume publication on Friday, December 3, 2021.

Update: coronavirus disease 2019 (COVID-19) in the U.S.
- Total cases: 48,106,615 total deaths: 776,070 [11-28-2021, posted 4:45 PM ET]
- Total cases: 47,916,623 total deaths: 773,779 [11-24-2021, posted 2:05 PM ET]
- Total cases: 47,813,785 total deaths: 772,180 [11-23-2021, posted 5:25 PM ET]

COVID-19 vaccinations in the United States
- Number of people receiving one or more doses: 231,367,686; 69.1% of population > 12 years of age fully vaccinated [11-28-2021, posted 4:45 PM ET]
- Number of people receiving one or more doses: 231,367,686; 69.1% of population > 12 years of age fully vaccinated [11-24-2021, posted 2:05 PM ET]
- Number of people receiving one or more doses: 230,669,289; 69.1% of population > 12 years of age fully vaccinated [11-23-2021, posted 5:25 PM ET]

World Health Organization | who.int
• WHO Director-General's opening remarks at the Special Session of the World Health Assembly [11-29-2021]
  o “The emergence of the highly-mutated Omicron variant underlines just how perilous and precarious our situation is. South Africa and Botswana should be thanked for detecting, sequencing and reporting this variant, not penalized. Indeed, Omicron demonstrates just why the world needs a new accord on pandemics: our current system disincentivizes countries from alerting others to threats that will inevitably land on their shores. We don’t yet know whether Omicron is associated with more transmission, more severe disease, more risk of reinfections, or more risk of evading vaccines. Scientists at WHO and around the world are working urgently to answer these questions. We shouldn’t need another wake-up call; we should all be wide awake to the threat of this virus. But Omicron’s very emergence is another reminder that although many of us might think we are done with COVID-19, it is not done with us.”
