Labstract - August 2013

Viral Hepatitis Serologic Testing
Changes to Test Ordering, Algorithm and Reporting

To Health Care Providers:

Effective September 30, 2013, the Public Health Ontario Laboratories (PHOL) will update its viral hepatitis serology (i.e. hepatitis A, B and C) ordering and testing process.

Background Information:

A number of different viral agents, such as Hepatitis A, B, and C, can infect the liver and result in hepatitis. Depending on the clinical situation, each agent requires a unique set of serologic tests for appropriate diagnosis and management. As part of PHOL’s commitment to continuous quality improvement, the PHOL’s viral hepatitis testing algorithm will be revised to assist clinicians in ordering the appropriate viral hepatitis serology tests required for clinical decision making.

There is no change in PHOL viral hepatitis serology testing methodology or availability.

Ordering Tests for Viral Hepatitis Serology:

To order viral hepatitis serology, please use the updated PHOL General Test Requisition form, available as of September 30th on the PHO website at
http://www.publichealthontario.ca/Requisitions

For viral hepatitis serology, please complete Section 3, including Reason for Test (Immunity, Acute Infection, or Chronic Infection) and the specific hepatitis virus(es) requested. Failure to properly complete the form may result in test delay or cancellation.
Specific viral hepatitis serologic tests can still be ordered based on the clinical situation and previous test results issued by PHOL or another laboratory. This information must be included on section 3 of the PHOL general test requisition. The following table indicates the specific serologic tests that will be performed based on the information provided:

<table>
<thead>
<tr>
<th>Reason for test:</th>
<th>Specific Virus(es) Of Interest</th>
<th>Hepatitis A</th>
<th>Hepatitis B</th>
<th>Hepatitis C</th>
</tr>
</thead>
<tbody>
<tr>
<td>Acute</td>
<td></td>
<td>Hep A IgM</td>
<td>HBsAg, HBCab Total(IgG + IgM) and HBClGm</td>
<td>HCV Antibody</td>
</tr>
<tr>
<td>Chronic</td>
<td></td>
<td>Not indicated²</td>
<td>HBsAg, HBCab Total(IgG + IgM)</td>
<td>HCV Antibody</td>
</tr>
<tr>
<td>Immunity</td>
<td></td>
<td>Hep A IgG</td>
<td>Anti-HBs</td>
<td>Not indicated³</td>
</tr>
<tr>
<td>Prenatal Screen</td>
<td></td>
<td>Not routinely tested⁴</td>
<td>HBsAg</td>
<td>Not routinely tested⁴</td>
</tr>
</tbody>
</table>

¹HBClGm is tested for acute requests only if HBCab Total (IgG + IgM) is reactive.
²Hepatitis A is not associated with chronic infection and thus no testing will be performed in this situation.
³There is no current serologic test which indicates immunity to hepatitis C and thus no testing will be performed.
⁴Routine testing for hepatitis A or C during prenatal screening is not currently recommended and will not be performed unless clinically indicated (e.g. outbreak investigation, etc.)
Results Interpretation:
A final interpretation will be issued on all reports when all tests have been completed.

Specimen Requirements and Turnaround Time:
There are no changes to the specimen type, collection, transport, volume requirements, or turnaround time with the changes to testing and reporting. For more information, refer to http://www.publichealthontario.ca/testdirectory

For information on recent changes to the revised General Test Requisition, refer to LAB-SD-019-001, Updates to PHOL General Test Requisition Effective September 30, 2013 at http://www.publichealthontario.ca/Lababstracts

For Further Information:

- Contact the PHOL Customer Service Centre at 416-235-6556 or 1-877-604-4567 (toll-free), or by email at CustomerServiceCentre@oahpp.ca
- For PHOL specimen collection information and previous Lababstracts, visit http://www.publichealthontario.ca/specimencollection
- Current versions of the PHOL General Test Requisition and other forms are available at http://www.publichealthontario.ca/Requisitions
- To subscribe to future Lababstracts, email lababstracts@oahpp.ca
- To register for Autofax and receive laboratory reports by fax directly from our laboratory information system as soon as they are released, contact the PHOL Customer Service Centre.
